## DETAILED ACTION

### *Priority*

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Bolken US 6,444,501.

Bolken discloses a multimedia card and method of making including providing a substrate (12) having a first and second opposite surfaces, wherein at least one semiconductor chip (14) and at least one passive component (13) are mounted on and electrically connected (104) to the first surface of the substrate, and a plurality of terminals (24) are formed on the second surface and exposed outside to serve as input/output connections for the device, and performing an encapsulation process to form an encapsulation body (26) on the first surface of the substrate for integrally encapsulating the chip and the passive component (see figs. 3, 5-6 and related text). Bolken also discloses that various types of materials and components may be used in the device which are known in the art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
